Our Members Spoke and We Listened

PROVIDENCE RI, April 13, 2009:

Listening to what you have to say!

Our members have used the site. They conducted barter with other members and now they are letting us know what they think. The overall consensus is they love the site. They love how easy it is to barter with others. However, with every gem, you have to keep it polished. We have received feedback and suggestions from many of our members. They want new functionality and features. Well, we listened.

Polishing the gem

MBM Investment Group, corp. has teamed up with Digital Alternatives to bring all of those suggestions to life. We spent hours with [Digital Alternatives](#) laying the ground work for the new release of [Barterthing.com](#). Beginning in April, the developers will hit the ground running adding new features that will propel Barterthing.com to the top of the heap. Members will have more control over how they barter. Top rated members will have the opportunity to bolster their profiles. Tutorials will be available for new members to help them get comfortable with bartering. And we are teaming up with other vendors to bring more and more tools and helpful information to make the bartering experience a delight.

Can it get better?

The question should be "when will it get better?" As new features are added to the site, they will be released to the public. We decided to release them as they are added because we want our members to enjoy these features right away. Why make them wait? All members will be notified of every feature release through our newsletter. We plan to solicit feedback from the members on the new features and ask that they be critical about them. This way we can refine any functionality that needs tweaking.

Sincerely,
Robert Johnson
President
